

ImageSync

A Better Way to Image

Capturing, managing, deploying images as well as re-imaging computers is a constant challenge when supporting purpose built devices. Now Micro's ImageSync Appliance was designed to simplify these tasks as well as provide additional features to benefit our solution provider partners.

Product Features

- **Branch Office Support:** Ensure all of your support locations are using the same images with additional ImageSync appliances
- **USB Flash Drive Creation:** With the push of a button create bootable USB flash drives for field re-imaging
- **Centralizing Management:** Centralized repository for all images
- **Easy Image Transfer:** Eliminating the need for shipping of images or FTP transfers, greatly decreasing the time needed for image testing and validation between engineering teams
- **Image Consistency:** With Now Micro and your engineering team working from the same synced image repository you can ensure image consistency across manufacturing, in-house imaging, as well as support
- **Optional:** Intel vPro management for full out-of-band servicing experience

Before ImageSync	With ImageSync You enjoy:
